Art Unit: 3753

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Edward Van Giesen on 1/6/2011.

The application has been amended as follows:

IN THE CLAIMS:

Claims 36-43 are cancelled.

Claims 36-43 are cancelled because the otherwise allowable subject matter was phrased only as an intended use, which the device disclosed in US 6,450,200 was seen as capable of performing.

The following is an examiner's statement of reasons for allowance: the prior art fails to teach a flow control device (or method) as claimed including a control system having a test mode, in which the valve drive signal is set to fix an aperture size of the flow control valve during a measurement period, wherein during the measurement

period the pressure at the valve aperture is unregulated and a time-changing pressure at the aperture of the valve results in a non-constant flow rate of the fluid flow through the aperture. (As alluded to in the preceding interview, Figures 3C-3E provide support for the absence of pressure regulation at the valve aperture.)

US 6,450,200 to Ollivier is considered the closest prior art, which discloses a flow control device as claimed with exception to the pressure being unregulated at the valve aperture. (Rather, Ollivier discloses pressure regulation and a constant flow rate during the test mode because the test is carried out during delivery of the process gas to the semiconductor apparatus, whereas Applicant's test is meant to be carried out at a time other than when delivering the process gas to the processing apparatus, thereby not requiring a constant flow rate.)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to WILLIAM MCCALISTER whose telephone number is (571)270-1869. The examiner can normally be reached on m-f, 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Hepperle can be reached on (571)272-4913. The fax phone
